EDUCATION

Mercyhurst University

M.S. Data Science, GPA: 4.0

Erie, PA

Expected Dec. 2026

California Polytechnic State University

B.S. Statistics, GPA: 3.2

San Luis Obispo, CA

Dec. 2024

EXPERIENCE

Data Science Researcher

Jan. 2026 – Present

Applied Intelligence Research – Mercyhurst University

- Developed machine learning and analytics solutions for university-sponsored research and client-facing projects using Python.
- Built AI-driven applications, including an intelligent resume screening system, in collaboration with multidisciplinary teams.
- Selected to lead the Applied Intelligence data science team for Summer and Fall 2026.

Statistics & Mathematics Tutor

Feb. 2026 – Present

Mercyhurst University

- Tutored undergraduate and graduate students in statistics, mathematics, and data science through individualized instruction.
- Explained statistical concepts and programming techniques to strengthen quantitative reasoning and problem-solving skills.

Data Science Intern

May 2024 – Aug. 2024

Space Force Research Project

- Conducted statistical analysis of orbital debris risk using R to support research into space-based search-and-rescue operations.
- Communicated technical findings through written reports and presentations.

Statistical Consultant

Mar. 2024 – Jun. 2024

Cal Poly Statistics Department

- Delivered statistical consulting for three client projects using SAS, R, and Minitab.
- Performed data analysis, statistical modeling, and presented findings directly to stakeholders.

PROJECTS

AI Resume Screening Application | Built a FastAPI application that leverages machine learning to evaluate resumes and support candidate screening workflows.

Interactive Analytics Dashboards | Developed Power BI dashboards using advanced DAX, dynamic filtering, and interactive visualizations.

Machine Learning Models | Implemented predictive models including logistic regression and neural networks using scikit-learn and PyTorch.

TECHNICAL SKILLS

Languages: Python, SQL, R, SAS

Machine Learning: scikit-learn, PyTorch, TensorFlow, Regression, Classification, Time Series Analysis

Tools: FastAPI, Git, GitHub, SQLAlchemy, SQLite, Power BI, Tableau, Excel
