EDUCATION

Mercyhurst University

M.S. Data Science, GPA: 4.0

Erie, PA

Expected Dec. 2026

California Polytechnic State University

B.S. Statistics, GPA: 3.2

San Luis Obispo, CA

Dec. 2024

EXPERIENCE

Center for Intelligence, Research, and Training (CIRAT) — Mercyhurst University

Student Director

Jan. 2026 – Present

- Lead a team of data science students through collaborative research projects and technical workshops designed to strengthen applied data science skills.
- Organize and facilitate biweekly team meetings, coordinate project activities, and connect students with appropriate project leads based on their interests and technical goals.

Data Science Analyst — Crime & Loss Research Project

May 2026 – Present

- Analyzed crime data for a Fortune 500 company and developed an interactive Power BI dashboard to model loss patterns and identify opportunities for future loss reduction.
- Presented dashboard findings and analytical insights directly to company executives, translating complex data into actionable business recommendations.

AI Resume Screening Application

- Developed a FastAPI application using machine learning to evaluate resumes and support candidate screening workflows.

Statistics & Mathematics Tutor

Feb. 2026 – Present

Mercyhurst University

- Tutored undergraduate and graduate students in statistics, mathematics, and data science through individualized instruction.
- Explained statistical concepts and programming techniques to strengthen quantitative reasoning and problem-solving skills.

Data Science Intern

May 2024 – Aug. 2024

Space Force Research Project

- Conducted statistical analysis of orbital debris risk using R to support research into space-based search-and-rescue operations.
- Communicated technical findings through written reports and presentations.

Statistical Consultant

Mar. 2024 – Jun. 2024

Cal Poly Statistics Department

- Delivered statistical consulting for three client projects using SAS, R, and Minitab.
- Performed data analysis and statistical modeling while presenting findings directly to stakeholders.

TECHNICAL SKILLS

Languages: Python, SQL, R, SAS

Machine Learning: scikit-learn, PyTorch, TensorFlow, Regression, Classification, Time Series Analysis

Tools: FastAPI, Git, GitHub, SQLModel, SQLite, Power BI, Tableau, Excel, Langflow
